

The chuck you asked for?

Scorpion auto chuck

The Scorpion uses µGrind **super chuck technology** with Schaublin collets. It virtually **eliminates runout** in minutes, using two simple gauges.

- Lets you virtually **eliminate both radial and axial runout** (weeble-wobble) without special tools or skill
- Lets you change diameters in seconds and **repeats within 5 microns** (under 2 tenths) at $2\frac{1}{2} \times D$ without adjustment
- W25 version covers 1 to 25 mm (0.04-1") diameter range
- W25 version swallows up to 18 mm (0.7") diameter tools up to 190 mm (7.5")
- Features a tapered profile and smaller nose diameter than hydraulic holders for **better wheel clearance** and freedom from interference
- Suitable for both **high production and regrinding**

Available for 3 collet types:

- Schaublin W20
- Schaublin W25
- Nann 3409

Let us know if you want a
B32/B45 version!

grinding deserves SOLUTIONS

GDS[®]
Made in Germany

For machine types:

- ANCA FX, MX, TX, & CPX
- Joerg
- Reinecker WZS 700, WZS 60 & RS 700
- Saacke UW ID, IF, and IIF tool grinders
- Star NXT machines
- Vollmer machines with the SK 50 or HSK 63 workhead
- All WALTER CNC tool grinders with the 50 taper workhead
